

chat.generateUrlPreview

Description

This event is sent to the [event listener URL](#) by Flock to request the app to unfurl a list of URLs. Your app is expected to send back an [Attachment](#) object in response to this event.

```
{
  "name": "chat.generateUrlPreview",
  "userId": "u:cfc76545-3400-4864-892a-513a9f4ae409",
  "url": "http://example.net",
  "chat": "u:1e6429de-16b7-48b3-acc0-c2d7ec5ad195",
  "messageId": "4458f0a9-eca7-4efb-8560-2a0fd3ac858d"
}
```

Event Attributes

Attribute Name	Attribute Type	Attribute Description
userId	String	User identifier
url	String (URL)	The URL to unfurl
to	String	Id of the user or group to whom the message was sent
messageId	String	Id of the message

Response

The app should respond back with an [Attachment](#).

```
{
  "attachment": {
    "title": "<content title>",
    "description": "<content description>",
    "url": "<the requested url>",
    "views": {
      "flockml": "<flockml>some <b>flockml</b> content</flockml>"
    }
  }
}
```
